Ration Balancer

SheepBytes Ration Balancer Now Available

Forty percent of the cost of bringing a lamb to market comes from feed. SheepBytes is an online tool that helps adjust feeding rations not only to make them cost-effective, but also to provide optimal flock nutrition for sheep in every stage of production.

SheepBytes has been developed and tested by nutritionists, software developers, industry advisors and end users. The program uses the latest nutrition requirement research to help improve the productivity of a flock.

This program is available by on line subscription at [www.sheepbytes.ca](http://www.sheepbytes.ca). Individual subscribers will pay an initial \$100 for the first year with a \$50 annual renewal. Commercial subscribers, feed mills, consultants etc, will pay an annual \$300 fee. Commercial subscribers have added tools to help manage multiple clients and the number of rations.

Visit [www.sheepbytes.ca](http://www.sheepbytes.ca) for a free demonstration and to subscribe.
